

Project description

Title

Garage

Description

With the garage application we want users (customers and employees) to be able to manage the cars and their maintenance. The application will be used by the employees to manage the cars and their maintenance. The customers will be able to see the status of their car and the maintenance that has been done on their car. The employees will be able to see the status of the cars and the maintenance that has been done on the cars. The employees will also be able to add new cars and maintenance to the cars. there will also be a login system for the employees and the customers.

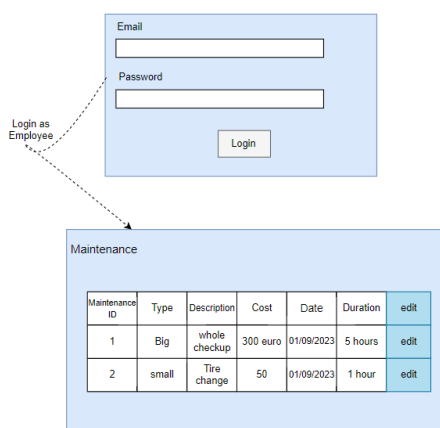

User Stories

Employee

As an employee

I'm able to login to the system

so that I can manage the cars and their maintenance

Acceptance criteria

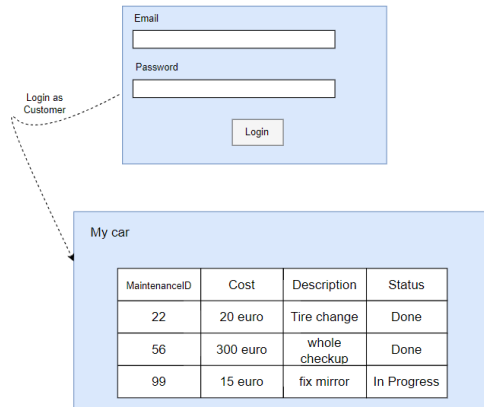

- A list of maintenances and their values is shown
